

## CONTAMINATED SITES

At **AXIOM GROUP**, our experienced and multi-disciplinary staff provide detailed scoping and critical analysis with Contaminated Site programs associated with industrial properties.

### SUMMARY OF CONTAMINATED SITE PROGRAMS:

#### Field Services:

- Cut & cap of abandoned orphan wells
- Gas migration tests
- Site investigations
- Site supervision
- Soil sampling
- Water sampling
- Surface casing vent flow tests
- Emergency spill response

#### Administrative Services:

- Project management and coordination
- Data interpretation and reporting
- Regulatory reporting to governing bodies
- Environmental risk identification
- Phase I & II ESA reporting

AXIOM GROUP can lead and complete the entire Contaminated Site process including but not limited to:

- Evaluating potential environmental, social, and economic sustainability
- Conducting Phase I and II ESA
- Emergency response plans
- Statistical analysis and trend monitoring services.
- Environmental liability reduction
- Environmental Performance Reports
- Adhering to applicable regulations and regulatory bodies within each region
